◇ 1. Basic Linux Commands

Command	Purpose
pwd	Print current working directory
ls -l	List files with details
cd /path	Change directory
touch file.txt	Create an empty file
mkdir folder	Create a directory
rm file.txt	Delete a file
rm -rf folder	Delete folder recursively and forcefully
cp file1 file2	Copy file
mv file1 file2	Move or rename file
cat file.txt	Show file contents
head -n 10 file.txt	Show first 10 lines
tail -n 10 file.txt	Show last 10 lines
echo "text"	Print text to screen
date	Show current date and time
cal	Show calendar

◇ 2. User & Group Management

Command	Purpose
adduser kranthi	Create a new user
passwd kranthi	Set password for user
userdel -r kranthi	Delete user and home directory
groupadd devops	Create a group

Command	Purpose
usermod -aG devops kranthi	Add user to group
id kranthi	Show user ID and groups
whoami	Show current user
su - username	Switch user
chage -l kranthi	List password aging info for user

◇ 3. Networking Commands

Command	Purpose
ip a or ifconfig	Show network interfaces and IPs
ping google.com	Test connectivity
traceroute google.com	Show route packets take
netstat -tuln	Show open ports and services
ss -tuln	Show socket statistics
curl ifconfig.me	Get public IP
nslookup google.com	DNS lookup
dig google.com	DNS lookup with details
hostname	Show system hostname
nmcli device status	Show network device status

◇ 4. Disk & File System (Storage)

Command	Purpose
df -h	Show disk space usage
du -sh /path	Show folder size
lsblk	List block devices

Command	Purpose
mount /dev/sdb1 /mnt	Mount disk
umount /mnt	Unmount disk
fdisk -l	Show disk partitions
mkfs.ext4 /dev/sdb1	Format disk with ext4 file system
blkid	Show UUID of block devices

◇ 5. File Permissions & Ownership

Command	Purpose
chmod 755 file	Change file permissions
chown user:group file	Change file owner and group
ls -l	Check permissions and ownership
umask	Show default permission mask

◇ 6. Process & Service Management

Command	Purpose
ps aux	Show all running processes
top	Real-time system monitoring
htop	Interactive process viewer (if installed)
kill PID	Kill process by PID
kill -9 PID	Force kill process
systemctl status nginx	Check status of nginx
systemctl start nginx	Start nginx service
systemctl stop nginx	Stop nginx service
systemctl enable nginx	Enable service on boot

◇ 7. Troubleshooting

Command	Purpose
dmesg	View kernel messages
journalctl -xe	Show recent system logs
tail -f /var/log/syslog	Live log monitoring
strace -p PID	Trace system calls of process
lsof -i :80	Show processes using port 80
uptime	Show load average and uptime

◇ 8. Archive/Compress Files

Command	Purpose
tar -czvf archive.tar.gz folder/	Compress folder
tar -xzvf archive.tar.gz	Extract archive
zip file.zip file1 file2	Zip files
unzip file.zip	Unzip file

◇ 9. Package Management (Debian/Ubuntu)

Command	Purpose
apt update	Update package lists
apt upgrade	Upgrade all packages
apt install nginx	Install a package

Command	Purpose
apt remove nginx	Remove a package

◇ 10. Package Management (RHEL/CentOS)

Command	Purpose
yum update	Update system packages
yum install nginx	Install a package
yum remove nginx	Remove a package
dnf	Next-gen replacement for yum in newer versions
